PagePress Sample Document

This is a sample document used to showcase PagePress PDF rendering.

Feature Overview

PagePress supports the following:

- **Markdown to PDF**: full GFM syntax support

- **Syntax highlighting**: automatic language detection and highlighting

- **Multiple templates**: default, github, magazine

Code Example

```
import { render } from './pdf/renderer.ts';

const result = await render({
  input: 'document.md',
  output: 'document.pdf',
  template: 'default',
});

console.log('PDF generated:', result.pdfPath);
```

Table Example

Template	Style	Use Case
default	Apple style	Technical docs
github	GitHub style	Open source projects

Template	Style	Use Case
magazine	Magazine layout	Marketing materials

Quote Example

> *Good design is as little design as possible.*
>
> - *Dieter Rams*

List Example

1. Step 1: Install PagePress
2. Step 2: Install Playwright browsers
3. Step 3: Run the command to generate a PDF
