WEB2PDF

WEB-TO-PDF

Convert Markdown/HTML/URL to professional PDF documents, ideal for technical documentation, reports, and archiving.

Theme Styles

This skill provides 5 carefully designed themes:

Theme	Style Description
default	Apple design style, clean and elegant
github	GitHub README style, clear and readable
academic	Academic paper style, two-column layout
sketch	Hand-drawn note style, personalized
magazine	Magazine layout style, drop cap effect

Code Highlighting Examples

JavaScript

```javascript
// Convert Markdown to PDF
import { toPdf } from "./converter.js";

async function convert() {
  const result = await toPdf({
    inputPath: "README.md",
    outputPath: "output.pdf",
    style: "github",
    options: {
      format: "markdown"
    }
  });

  console.log(`PDF generated: ${result.pdfPat
}
```

Python

```python
def fibonacci(n: int) -> list[int]:
    """Generate Fibonacci sequence"""
    if n <= 0:
        return []
    if n == 1:
        return [0]

    sequence = [0, 1]
    while len(sequence) < n:
        sequence.append(sequence[-1] + sequen
    return sequence

# Example usage
print(fibonacci(10))  # [0, 1, 1, 2, 3, 5, 8,
```

Table Examples

CLI Parameters Overview

Parameter	Description	Default
`--input`	Input file path (md/html)	Required
`--output`	Output PDF path	Required
`--style`	Theme style	`default`
`--format`	Input format	`markdown`
`--no-html`	Don't keep intermediate HTML	`false`
`--no-mermaid`	Disable Mermaid pre-rendering	`false`

Blockquote Styles

> ***Tip****: This skill supports Mermaid diagram pre-rendering.*
> *Just use standard mermaid code blocks in your Markdown.*

List Styles

Unordered List

- Supports Markdown syntax highlighting
- Automatically handles Mermaid diagrams
- Multiple preset themes available
- Print-ready output quality

Ordered List

1. Install dependencies: `npm install`
2. Run Playwright: `pnpm exec playwright install chromium`
3. Execute conversion: `node scripts/converter.js --input doc.md --output output.pdf`

Footnotes and Emphasis

This is a paragraph with **bold**, *italic*, `inline code` , and [links](#).

For scenarios requiring math formulas, you can use LaTeX syntax[1].

Separation and Typography

This skill focuses on **output quality**, with each theme carefully crafted:

- Clear font hierarchy
- Comfortable line height and spacing
- Code block syntax highlighting
- Beautiful tables and blockquotes

> *High-quality PDF output, starting from Markdown.*
